3 SUCCESSOR

Compared to its predecessor products in the TWN4 MultiTech series, the successor TWN4 MultiTech 2 series supports not only single frequencies but all common 125 kHz and 13.56 MHz RFID technologies as well as NFC and BLE.

The TWN4 MultiTech 2 series offers a wide range of product variants, that surpass those of its predecessor. Interfaces such as USB, RS-232, TTL and others are available. In addition, individualizations can be made to the reader such as customization of the inlay and firmware. The Powerful SDK can be used to develop apps, that run directly on the reader. In addition, the firmware can be updated in the field.

There is no direct successor product for the TWN4 MultiTech Pocket Kit, but we can recommend the TWN4 Slim as a successor product. As the TWN4 MultiTech Pocket Kit is mostly chosen because of the limited installation space, the TWN4 Slim is the ideal choice as it is smaller than an ID-1 card.

Below you will find an overview with the indication of the replacement product for your device:
